Underwriting criteria

Q3 2018

Affordability

- Customers ability to service its commitment out of its cash flow/income is critical
- Repayment ability of borrowers is calculated using stressed scenarios. Customers must manage 5 percentage points increase on interest rate on all debt
- Scoring of retail customers

Payment history

- Credit bureau check is always conducted. Potential external payment remarks are revealed

Collateral

- Information from Norwegian official property register in order to secure correct real estate ownership and priority
- Nordea accepts four sources of real estate valuations:
 - a) Written statement from external authorized valuer
 - b) Last sales price (within 6 months)
 - c) Use of external evaluating system “Eiendomsverdi” (used by most banks and real estate agents in Norway)
 - d) Written statement from (external) real estate agent

5. Covered Bond framework

Norwegian covered bond framework

Q3 2018

- Legal framework
 - Norwegian Financial Institutions Act (2007)
- Registration and independent inspector
 - A mortgage credit institution shall for each cover pool establish a register of loans, interest rate contracts and foreign exchange contracts, substitute assets and covered bonds
 - The institution shall put forward an independent inspector who shall be appointed by the FSA “Finanstilsynet”
- Limit on LTV ratio – based on the current value
 - 75% for housing loans (residential property)
 - 60% for commercial loans (commercial property)
- Matching cover requirements
 - The value of the cover pool shall at all times exceed the value of covered bonds with a preferential claim over the pool and account shall be taken of the mortgage credit institution’s derivative contracts
- Liquidity requirements
 - The mortgage credit institution shall ensure that the payment flows from the cover pool enable the mortgage credit institution to honour its payment obligations towards holders of covered bonds and counterparties to derivative contracts at any and all times

6. Macro

Robust Nordic economies

GDP development

Comments

- The Nordics are enjoying a solid economic development. While the synchronised global recovery supports exports, the accommodative monetary policies support domestic demand
- Short-term survey indicators have declined somewhat from elevated levels, but nevertheless suggest that growth will be held up fairly well in the near-term

Household debt remains high, but so is private and public savings

Household debt

Household savings

Public balance/debt, % of GDP, 2018E

Comments

- In all countries, apart from Denmark, household debt continues to rise somewhat faster than income. Meanwhile, households' savings rates remain at high levels, apart from Finland where savings have declined somewhat in recent years
- The Nordic public finances are robust due to the overall economic recovery and relatively strict fiscal policies. Norway is in a class of its own due to oil revenues

House price development in the Nordics

House prices

Household's credit growth

Comments

- Recent quarters have shown stabilisation in the Swedish and Norwegian housing markets, while prices continue to rise in Denmark and to some extent also in Finland.
- In Sweden house prices declined during H2 2017 but the trend has levelled out in 2018, despite increased regulations which was expected to put downward pressure on house prices. The price correction is probably caused by the marked rise in new buildings seen in recent years. Going forward, largely stagnant prices are expected as mortgage rates are expected to stay low
- In Norway, primarily in Oslo, house prices turned down during 2017. The downturn was primarily driven by stricter lending requirements introduced 1 January 2017. However, prices have levelled out, and even increased somewhat in Oslo, in recent months. Largely unchanged prices are forecast ahead.
