Report on the key aspects of the systems for internal control and risk management regarding financial reports for the financial year 2020

Nordea Mortgage Bank Plc belongs to the Nordea Group. The internal control and risk management systems in relation to the financial reporting process are organised at Nordea level. Financial reporting processes are fully integrated within Nordea. The Board of Directors of Nordea Mortgage Bank Plc monitors financial and risk reporting at Nordea Mortgage Bank Plc level and has dealt with the risk reports at Nordea Mortgage Bank Plc level. Nordea Mortgage Bank Plc complies with the Group Internal Rules and supporting instructions to the extent applicable.

The systems for internal control and risk management of financial reporting are designed to provide reasonable assurance about the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles, applicable laws and regulations, and other requirements for listed companies. The internal control and risk management activities are included in Nordea's planning and resource allocation processes. Internal control and risk management of financial reporting at Nordea can be described in accordance with the COSO Framework as follows below.

Control Environment

The control environment constitutes the basis for Nordea's internal control and centres around the culture and values established by the Board of Directors and Group Executive Management of Nordea Bank Abp, and the organisational structure, with clear roles and responsibilities.

A clear and transparent organisational structure is of importance for the control environment. Nordea's business structure aims to support the overall strategy, ensuring strong business momentum and increased requirements on capital and liquidity. The business and the organisation are under continuous development.

Clear roles and responsibilities are critical in the governance of the internal control of financial reporting where the risk owners in the business areas and Group Finance & Treasury are responsible for the risk management activities. A risk management function supports the Group CFO in maintaining a Group wide set of controls (in Nordea defined as Accounting Key Controls (AKC)), in line with the risk framework, which covers the control of risks and the risk identification process that to a large extent is based on the actual business and financial closing processes in place. An independent risk control function that is responsible for identifying, controlling and reporting on financial reporting risk has been established in Group Risk Management and Control (GRMC). In addition, the internal audit function provides the Group Board with an assessment of the overall effectiveness of the governance, risk management and control processes.

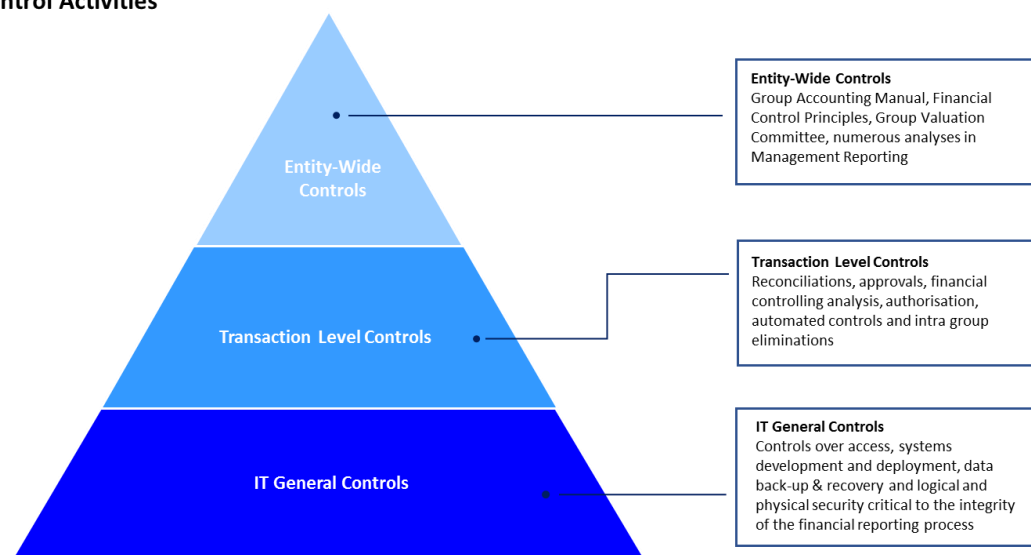

The control environment is implemented in NMB where the CFO of NMB is responsible for maintaining the set of controls covering the control of risks and the risk identification process in accordance with the AKC. The CRO of NMB is the independent second line of defence risk management function within NMB responsible for identifying, controlling and reporting on financial reporting risk. GIA as the third line of defence function provides the Board of NMB with an assessment of the overall effectiveness of the governance, risk management and control processes.

Risk Assessment

The Group Board of Directors bears the ultimate responsibility for limiting and monitoring Nordea's risk exposure. Risk management is considered to be an integral part of running the business and the main responsibility for performing risk assessments regarding financial reporting risks lies with the business organisation. Performing risk assessments close to the business increases the possibility of identifying the most relevant risks. In order to govern the quality, central functions stipulate in governing documents when and how these assessments are to be performed. Examples of risk assessments are the recurring Control Self-Assessments and the event driven Change Risk Management and Approval Process.

Risk assessment in relation to reliable financial reporting involves the identification and analysis of risks of material misstatements. Financial reporting risk control work in Nordea focuses on risks and processes which could lead to material financial misstatements, i.e. misstatements that if they occurred would significantly and adversely affect Nordea. The scope of the AKC is therefore areas where risks of material financial misstatements exist, i.e. where the judgment of a reasonable person relying upon the report would have been changed or influenced by the inclusion of correction of the misstated item. Structured risk assessment procedures determine in which divisions, locations and/or processes risks for material financial misstatements exist and therefore will need to be monitored under the AKC framework to ensure reasonable assurance of the reliability of Nordea's external financial reporting.

Control Activities

The heads of the respective units are primarily responsible for managing the risks associated with the units' operations and financial reporting processes. This responsibility is primarily supported by the Group Accounting Manual (GAM), the Financial Control Principles and various governing bodies, such as the Group Valuation Committee. The GAM includes a standard reporting package used by all entities to ensure consistent use of Nordea's principles and coordinated financial reporting. Fundamental internal control principles at Nordea are the segregation of duties and the four-eyes principle when approving, for instance, transactions and authorisations.

AKC control structure is based on that Transaction Level Controls (TLC) are identified through analysing risks based on high level processes with an end-to-end product focus. After deciding on the TLCs, an analysis is performed to decide what systems/applications are in scope for AKC where specific IT General Controls are governed. The analysis aims at scoping in the major systems where there is a risk that data, which is not detected in the TLC control structure, could become corrupt.

The quality assurance vested in the management reporting process, where a detailed analysis of the financial outcome is performed, constitutes one of the most important control mechanisms associated with the reporting process. The reconciliations constitute another set of important controls with which Nordea works continuously to further strengthen the quality.

Information & Communication

Group Finance & Treasury is responsible for ensuring that the Group Accounting Manual and the Financial Control Principles are up-to-date and that changes are communicated with the responsible units. These governing documents are broken down into guidelines and standard operating procedures in the responsible units. Accounting specialists from Group Finance & Treasury continuously provide accountants and controllers with information on changes in order to inform of existing and updated rules and regulations with an impact on Nordea.

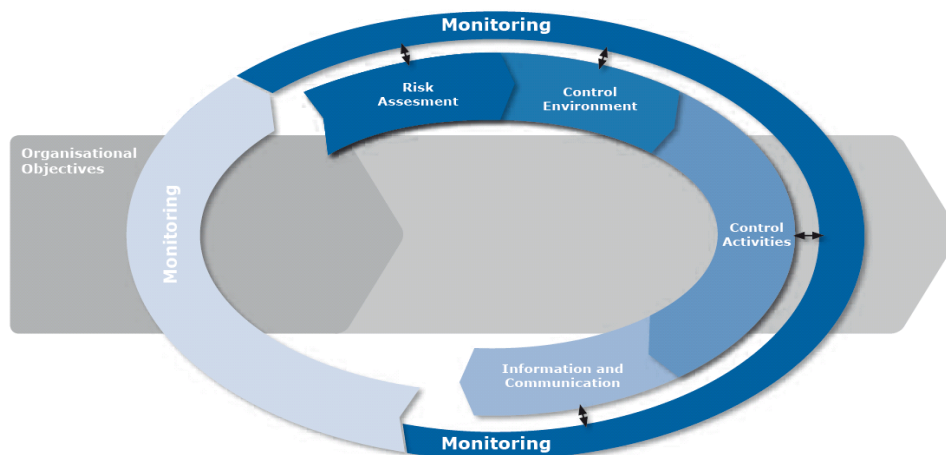

The key criteria applied when communicating financial information to the market are “correct, relevant, consistent, reliable and timely”. The information is to be disclosed in such a way that the information is made available to the public in a fast and non-discriminatory manner.

Nordea interacts with relevant subject-matter experts to ensure fulfilment of financial reporting objectives. Nordea actively participates in relevant national forums, such as forums established by the financial supervisory authorities, central banks and associations for financial institutions.

AKC reporting procedures provide the management at different levels in the organisation with information related to the performance and assessment of the identified AKCs in the form of Process Owner reports and Management Dashboard reports with a summarised assessment outcome and high-risk areas. As all the operations of NMB are integrated into the operations of the Nordea Group, also the AKC reporting procedures are applicable to it. The CFO and CRO receive AKC reporting quarterly.

Monitoring

Nordea has established a process with the purpose of ensuring the proper monitoring of the quality of financial reporting and the follow-up regarding possible deficiencies. This interactive process aims to cover all COSO components in the framework and is illustrated with the diagram below:

The Risk and Control Self-Assessment process covers identification and assessment of risks and controls, which also includes risks and controls related to financial reporting.

The Board of Directors, the Board Audit Committee and the Board Risk Committee of Nordea Bank Abp, as well as Group Internal Audit (GIA), have important roles in respect of overseeing and monitoring the internal control of financial reporting in the whole Nordea Group. Similarly, the Board of Directors and the Board Audit Committee of Nordea Mortgage Bank Plc have an important role with regard to monitoring the internal control of financial reporting in Nordea Mortgage Bank Plc.

Group Finance & Treasury has also established specific quarterly reporting regarding the internal control of financial reporting to the Group CFO covering risk management and high-risk areas. The independent risk control function within GRMC reports specifically on financial reporting risk to the Board Audit Committee and the CEO in Group Executive Management on a quarterly basis.

Auditors

According to the Articles of Association, the auditor must be elected by the General Meeting for a term of one year. NMB's auditors were elected by the Annual General Meeting of Nordea Mortgage Bank Plc on 19 February 2020. The auditor must be an audit firm authorised by the Finnish Chamber of Commerce.
