

## Corporate Access Account Reporting Message Implementation Guidelines

### **camt.053.001.02 – Account Statement Standard** BankToCustomerStatementV02

MIG version: 1.5

Date: 14/03/2020

This version is expected to be launched to the market during Q2 2020 or the earlier date as announced by Nordea.

7.1 Account Statement Standard – Entry level – Batch booking entries .....	15
7.2 Account Statement Standard – Entry level – Single booking entries .....	16

## 1. Introduction

These Message Implementation Guidelines (MIG) were prepared on behalf of Nordea Group (hereinafter “Nordea”).

The purpose of this documentation is to define how information in a financial statement message is structured for the exchange between Nordea and the message receiver.

These Message Implementation Guidelines comply with the international definitions for content and use of an ISO 20022 camt.053.001.02 BankToCustomerStatement and Common Global Implementation - Market Practice (CGI-MP) recommendations, which are available at: [CGI-MP link](#)

**Note:** This document may be subject for future changes and will in those cases be duly informed by Nordea.

## 2. About Corporate Access

*Corporate Access* is Nordea’s file-based Cash Management solution. The service enables Nordea’s customers to execute harmonised and straightforward ordinary commercial (incl. SEPA) payments as well as for example salaries, pension, urgent and cross-border/cross-currency payments (pain.001.001.03) from accounts in all the countries in the Nordic region. In return, the customer will receive status reports (pain.002.001.02) and debit notifications (camt.054.001.02). The solution includes the possibility for customers to perform cancellation of payments, sent in pain.001.001.03, by use of Message type camt.055.001.01 (CustomerPaymentCancellationRequest). Nordea will as a response to a camt.055.001.01 send a pain.002.001.03 and camt.029.001.03 (i.e. ResolutionOfInvestigation).

In addition, the Bank to Customer Statement message (camt.053.001.02) may be sent by Nordea to an account owner or to a party authorised by the account owner to receive the message. It can be used to inform the account owner, or authorised party, of single or multiple debit entries reported to the account. This version includes all Nordic countries, i.e. Denmark, Finland, Norway and Sweden.

## 3. Bank Transaction Codes

Bank Transaction Codes are used to define which types of transactions are reported in the statement. Nordea uses the standard codes according to ISO. Appendix 1, included into this document, provides further details.

## 4. Nordea usage of the ISO 20022 format

The term “message” is used for one XML schema occurrence, which is a combination of blocks called Group Header, Statement, Entry and TransactionDetails information. One file will only contain one Message. A message sent by Nordea will in the first release contain Statements for one Debtor/account as agreed under the Corporate Cash Management agreement with Nordea. Each Statement will include one or more Entry’s whereas, dependent on booking option chosen by Debtor/Customer, each Entry will consist of one or more TransactionDetails.

All elements or tags defined as “Mandatory” by ISO 20022 for camt.053.001.02 are included in Nordea’s *Corporate Access Account Reporting* MIG. This also includes elements or tags that are optional or conditional, depending on specific criteria, as set by the service (or local country infrastructure). Elements or tags not

used by the service are not included in this MIG, even if they are included in the “ISO 20022 Message Definition Report” or in the “CGI-MP Implementation Guide for ISO 20022 BankToCustomerStatement”. This is to enable a smooth introduction of the service for potential users.

The following is a description of used fields and columns in the MIG:

ISO Index	Structural sequence	Or	camt.053.001.02 – Account Statement Message Item	XMLTag	Mult.	Type	Nordea Use	Nordea comment
-----------	---------------------	----	--	--------	-------	------	------------	----------------

**ISO Index No** = Reference number that refers to the related description in the “ISO 20022 Message Definition Report”

**Structural sequence** = Informs about which level a specific field is placed within the XML structure

**Or** = Nordea will provide one or the other field, but not both

**Message Item** = Refers to the actual tag name in ISO 20022, which is also stated under the column XML Tag Name. This can be a Message element (a.k.a. a “field” in a traditional sense), or a Message Component (i.e. a group of information consisting of several elements). Each message element is stated with the element type it comprises (stated under column Type).

**XML Tag** = Specific code referring to an XML element and will be part of the XML Schema for the identification of an XML element. The “Tag Name” will be stated at the beginning of a string which is to include the required information (i.e. <Debtor>) and will end the string with the same “Tag Name”, starting with a slash (i.e. </Dbtr>).

**Multiplicity** = Informs how many times an element can or must be used, as defined by ISO.

1..1	One occurrence (required)
1..n	One or several occurrences (value for “n” represents total number of occurrences)
1..3	Minimum one occurrence must be used, and maximum 3 occurrences can be used. <b>Note:</b> True value of “n” represents unlimited number of occurrences.
0..1	None or one occurrence to be used (optional)
0..n	None or several occurrences can be used (value for “n” represents total number of occurrences) <b>Note:</b> True value of “n” represents unlimited number of occurrences.

**Type** = States the value to be transferred in the actual XML element. There is a total of seven different “Data Type” representations that can be used in a “BankToCustomerStatement”: Identifier, Code, Text, Rate, Date Time, Amount & Indicator. See examples below:

Data Type	Type	ISO Index	Example
Identifier	PartyId32	1.8	SALES COMPANY PARTY
Code	PaymentMethod3Code	2.2	TRF = Credit Transfer
Text	Max35Text	2.1	AA22BB11
Rate	Rate	2.48	10.99999
Date Time	ISODateTime	1.2	2015-07-21T05:32:31Z
Amount	DecimalNumber	2.5	99999.99
Indicator	Indicator	2.3	true = Batch booking requested

**Nordea Use** = This column states the classification Nordea uses for each tag/element in this MIG. ISO 20022 uses the classification “1..n” as mandatory and “0..n” for optional usage. Nordea uses a slightly more gradient classification, such as:

Attribute		
Code	Terminology	Definition
R	Required	Mandatory by ISO 20022 or Required by CGI-MP.
XOR	eXclusive Or	Select either field, but not both
C	Conditional	Dependent upon certain conditions <i>or</i> optional to use by Nordea

**Nordea comment** = Informs of special rules or usage for each element. If no comments exist, then standard usage according to ISO 20022 applies.

The files sent by Nordea will be in UTF-8 format.

For information/description about technical issues such as security, retransmissions, or duplicates, please see Service description for *Corporate Access File Transfer* at [nordea.com/corporateaccess](http://nordea.com/corporateaccess)

More information on ISO 20022 definitions on camt.053.001.02 is available on the ISO 20022 website: ([Link](#))

## 6. Guidelines

ISO Index	Structural sequence	Or	camt.053.001.02 - Bank To Customer Statement Message Item	XMLTag	Mult.	Type	Nordea Mult.	Nordea comment
	-		Bank To Customer Statement	<BkToCstmrStmnt>				
1.0	+		GroupHeader	<GrpHdr>	[1..1]	GrpHdr42	R	Message root, identifying message type
1.1	++		MessageIdentification	<MsgId>	[1..1]	Max35Text	R	Identification created by Nordea and will be unique for min. 90 calendar days.
1.2	++		CreationDateTime	<CreDtTm>	[1..1]	ISODateTime	R	Date and time at which the message was created. Nordea applies UTC or local time. Example: 2015-07-21T05:32:31Z
1.3	++		MessageRecipient	<MsgRcpt>	[0..1]	PartyIdentification32	R	This item identifies the recipient(s), as agreed with Nordea. Only identifications registered by Nordea will be reported.
9.1.12	+++		Identification	<Id>	[0..1]	Party6Choice	R	
9.1.13	++++		OrganisationIdentification	<OrgId>	[1..1]	OrganisationIdentification4	R	
9.1.14	+++++		BICOrBEI	<BICOrBEI>	[0..1]	AnyBICIdentifier	C	Code allocated to organisations by the ISO9362 Registration Authority, under an international identification scheme, as described in the latest version of the standard ISO 9362 Banking (Banking telecommunication messages, Bank Identifier Codes).  Must be agreed with Nordea
9.1.15	+++++		Other	<Othr>	[0..n]	GenericOrganisationIdentification1	R	
9.1.16	+++++		Identification	<Id>	[1..1]	Max35Text	R	Customer identification with code CUST, as assigned by Nordea (Service Id), will be reported.  Code BANK will always be reported (i.e. sender) with value "NDEAPROD", indicating that the file is sent from Nordea's production environment.
9.1.17	+++++		SchemeName	<SchmeNm>	[0..1]	OrganisationIdentificationSchemeName1Choice	C	
9.1.18	+++++		Code	<Cd>	[1..1]	ExternalOrganisationIdentification1Code	R	<b>Used codes:</b> BANK BankPartyIdentification (Nordea) CUST Customer number

ISO Index	Structural sequence	Or	camt.053.001.02 - Bank To Customer Statement Message Item	XMLTag	Mult.	Type	Nordea Mult.	Nordea comment
2.0	+		Statement	<Stmt>	[1..n]	Acct.Stmt.2	R	Each statement contains one account.
2.1	++		Identification	<Id>	[1..1]	Max35Text	R	Unique identification, as assigned by Nordea, to un-ambiguously identify the account statement. Unique at Nordea for min. 90 calendar days. <b>Note:</b> Nordea will use date/time (i.e. YYYYMMDDHHMMSS), currency and last four (4 digits) of the reported account.
2.2	++		ElectronicSequenceNumber	<ElctrncSeqNb>	[0..1]	Quantity	R	Sequential number will always be reported, assigned by Nordea. <b>Note:</b> Will continue incrementally and not reset.
2.3	++		LegalSequenceNumber	<LglSeqNb>	[0..1]	Quantity	C	Sequential number of the report, assigned by Nordea. It is increased incrementally by 1 for each report sent electronically. <b>Note 1:</b> Will be reported with zero ("0") when no movements on the account <b>Note 2:</b> Will be reset after every year-end.
2.4	++		CreationDateTime	<CreDtTm>	[1..1]	ISODateTime	R	Date and time at which the statement was created. Expressed using UTC designator [Z] with or without offset. Example: 2015-07-21T05:32:31Z
2.6	++		CopyDuplicateIndicator	<CpyDplctInd>	[0..1]	CopyDuplicate1Code	C	Indicates whether the statement is a duplicate. <b>Used code:</b> DUPL Message is a duplicate of a message previously sent
2.10	++		Account	<Acct>	[1..1]	CashAccount20	R	Customers can choose to have the account number reported as IBAN or BBAN. Based on CCM Agreement. <b>Finland:</b> Only IBAN available.
1.2.0	+++		Identification	<Id>	[1..1]	AccountIdentification4Choice	R	
1.2.1	++++	{Or	IBAN	<IBAN>	[1..1]	IBAN2007Identifier	XOR

## 7. Appendix 1 – Bank Transaction Codes – Account statement Standard

### 7.1 Account Statement Standard – Entry level – Batch booking entries <sup>1</sup>

In case batch (lump-sum) booking applies by Nordea (valid for Domain “Payments”) the following Bank Transaction codes will be used on Entry level. When in combination with Family “Issued” it reflects out-going payments processed via Nordea’s service Corporate Access Payables. If an Entry cannot be defined both “Family” and “Sub-family” with code “NTAV” will be reported or Domain “Extended Domain”, i.e. “XTND-NTAV-NTAV”.

**Note:** For Account Statement Standard only Entry level Bank Transaction codes will be reported, see also chapter 1.2 below.

Domain	Family	Sub-Family	Domain	Family	Sub-Family	Denmark	Finland	Norway	Sweden
Payments	Issued Credit Transfers	Domestic Credit Transfer	PMNT	ICDT	DMCT	Y		Y	Y
Payments	Issued Credit Transfers	SEPA Credit Transfer	PMNT	ICDT	ESCT		Y		
Payments	Issued Credit Transfers	Payroll/Salary Payment	PMNT	ICDT	SALA	Y	Y	Y	Y
Payments	Issued Credit Transfers	Cross-Border Credit Transfer	PMNT	ICDT	XBCT	Y	Y	Y	Y
Payments	Not Available	Not Available	PMNT	NTAV	NTAV	Y	Y	Y	Y
Payments	Received Credit Transfers	ACH Transaction	PMNT	RCDT	ATXN			Y	
Payments	Received Credit Transfers	Domestic Credit Transfer	PMNT	RCDT	DMCT			Y	
Payments	Received Credit Transfers	Not Available	PMNT	RCDT	NTAV				Y
Payments	Received Credit Transfers	Credit Transfer With Agreed Commercial Information	PMNT	RCDT	VCOM	Y		Y	
Payments	Received Direct Debits	Direct Debit	PMNT	RDDT	PMDD			Y	
Extended Domain	Not Available	Not Available	XTND	NTAV	NTAV	Y	Y	Y	Y

<sup>1</sup> Nordea’s Bank Transaction Codes are subject for changes and will be announced by Nordea when such changes will occur

## 7.2 Account Statement Standard – Entry level – Single booking entries <sup>1</sup>

When single bookings apply by Nordea then Bank Transaction Code as shown below will be used on Entry level. If an Entry cannot be defined both “Family” and “Sub-family” with code “NTAV” will be reported or Domain “Extended Domain”, i.e. “XTND-NTAV-NTAV”.

Domain	Family	Sub-Family	Domain	Family	Sub-Family	Denmark	Finland	Norway	Sweden
