Board of Directors' Report

Introduction

Nordea Eiendomskreditt AS is licensed by the Norwegian Financial Supervisory Authority to issue covered bonds. The company's business objective is to grant and acquire residential mortgage loans and loans to holiday homes in Norway, including secured construction loans, and to finance its lending activities mainly by issuing covered bonds. The mortgage loan portfolio of NOK 447bn at the end of March 2025 consists of loans originated directly from own balance sheet, bought from the parent bank, or added as a result of other business operations, including acquisition of mortgage loans from Danske Bank in Q4 2024. Nordea Eiendomskreditt is a wholly owned subsidiary of Nordea Bank Abp and part of the Personal Banking Business Area in Nordea. The company's registered business address is located in Oslo.

Income Statement

(Previous year comparable figures are shown in brackets)

Profit before loan losses

Net interest income in the first quarter increased by 65% compared to the same period last year and amounted to NOK 1 060m (NOK 641m). The increase is driven mainly by higher lending volumes resulting from the acquisition of Danske Bank's Norwegian mortgage portfolio in Q4 2024, and higher lending margin including effect from higher equity this year.

Net fee and commission income was a net expense of NOK 6m (net income of 23m). The reduction is mainly a result of higher liquidity facility fee paid to the parent bank in in the first quarter 2025 compared to last year.

Net result from items at fair value was a gain of NOK 9m in the first quarter of 2025 (loss of NOK 12m). The change from last year is mainly related to unrealised gain in the hedge portfolio.

Total operating expenses in the first quarter amounted to NOK 534m (NOK 331m), whereof NOK 11m (NOK 9m) is staff related. Other operating expenses are mainly related to services bought from the parent bank, such as sales and distribution of mortgage loans, management of the loan portfolio and customer contact, as well as funding, risk control, accounting, reporting and IT related services. The main part is related to sales, distribution and management of the mortgage loans, where the fee is calculated based on net interest income, and will therefore fluctuate between periods. All group internal transactions are settled according to market-based principles on conformity with OECD guidelines on transfer pricing. The cost/income ratio for the first quarter of 2025 was 50.3% (50.9%).

Net loan losses

Loan losses and provisions recognised in the first quarter of 2025 were a net income of NOK 80.0m (net loss of NOK 26.6m), whereof NOK 81.7m is related to release of collective allowances for mortgage loans and NOK 1.7m is net realised loan losses. A smaller part is related to reimbursement right for a financial guarantee from the parent bank.

Loan loss allowances, including management judgement allowances, have decreased from NOK 442m at the beginning of the year to NOK 366m at the end of March 2025, due to positive macro impacts, migration of loans between stages and release of management judgement allowances.

The underlying net loan losses in Nordea Eiendomskreditt are low, reflecting a strong credit portfolio. Loans in stage 2 have decreased due to positive migration of customers' risk grade, which is reflected in the reduced loan loss allowances.

The management judgements, held to cover expected credit losses not yet adequately captured by the IFRS 9 modelled outcome, were NOK 174m at the end of the first quarter, after release of NOK 47m due to improved macroeconomic outlook including stabilised interest rates. See note 4 and note 7 for further information about loan losses and impairment.

Net profit

Operating profit in the first quarter of 2025 was NOK 609m (NOK 294m). The increase compared to first quarter last year is mainly related to significant increase in net interest income, driven by higher lending volume and increased lending margin, as well as release of collective loan loss allowances.

Profit after tax in the first quarter of 2025 was NOK 456m (NOK 220m) which gives a return on average equity of 4.8% (4.0%). The return on equity is impacted by the agreed pricing model for sales- and distribution fees that are paid to the parent bank.

Funding and liquidity

During the first quarter of 2025 Nordea Eiendomskreditt issued covered bonds amounting to NOK 33.3bn in the Norwegian domestic market under its NOK 350bn domestic covered bond program. In the same period NOK 39.9bn have been bought back or matured. At the end of March 2025, Nordea Eiendomskreditt had outstanding covered bonds totalling NOK 261.8bn in the Norwegian market and EUR 0.1bn in the European market. Nordea Eiendomskreditt also had subordinated debt outstanding to the amount of NOK 1.1bn.

In addition to the long-term funding, Nordea Eiendomskreditt also raised unsecured funding from the parent bank. At the end of March 2024 such borrowings amounted to NOK 152.8bn.

Nordea Eiendomskreditt holds a liquidity buffer of NOK 10.3bn and the Liquidity Coverage Ratio (LCR) according to the EBA Delegated Act was 1,059% (1,382%) at the end of March 2025. Additionally, in order to ensure sufficient cash resources to meet its payment obligations, the company has an overdraft facility with the parent bank and a committed liquidity support agreement with the Nordea Group. Net Stable Funding Ratio (NSFR) was 116.7% (113.6%) at the end of March 2025.

Rating

The company has since April 2010 had the rating Aaa from Moody's Investor Service for the covered bonds issued by the company.

Lending

The gross book value of loans to the public amounted to NOK 448bn at the end of March 2025 (NOK 345bn). The year on year growth of 30% is driven by the acquisition of Danske Bank's Norwegian mortgage portfolio in Q4 2024. NOK 422bn (NOK 322bn) of the loan portfolio is included in the collateral pool for the purposes of the calculation of the asset coverage requirement under the covered bond legislation. This represents surplus collateral of 60.5%. (45.3%) in relation to gross issued covered bonds.

Total assets amounted to NOK 459bn at the end of March 2025 (NOK 357bn).

Impaired loans

As of 31 March 2025 impaired loans amounted to NOK 1,206m which corresponds to 0.27% of the total loan portfolio. Allowances of NOK 135m have been made, and net impaired loans were NOK 1 072 at 31 March 2025 compared to NOK 807m at 31 March 2024.

Interest rate and currency hedging

The company uses interest rate and currency swaps to hedge interest rate and currency risk. At the close of the first quarter of 2025, the company was party to interest rate swaps with a nominal value of NOK 41.9bn. In accordance with IFRS, fair value changes of interest rate swaps and the corresponding hedged items (fixed-rate lending and fixed-rate issued bonds) due to changes in market rates, are recognised in the profit and loss accounts. In order to eliminate the foreign exchange risk, the company has entered into currency swaps of the same amounts as covered bonds issued in foreign currencies. Counterparties to all derivative contracts are within the Nordea Group.

Regulatory development Lending regulations

The Ministry of Finance decided on 4 December to adopt changes in the Norwegian lending regulation (Norwegian regulation on financial institutions lending practices) with effect from 1 January 2025. The main change was increased requirement for maximum loan-to-value from 85% to 90%.

Capital requirements

On 3 March 2025 the Ministry of Finance published information that the CRR3 will enter into force in Norway with effect from 1 April 2025. CRR3 was implemented 1 January 2025 in the EU.

On 1 April 2025 the Norwegian FSA sent their advice on the identification of five systemically institutions to the Ministry of Finance. As expected, Nordea Eiendomskreditt AS continues to be identified as systemically important institution.

Capital position

Nordea Eiendomskreditt's Common Equity Tier 1 capital ratio was 28.2% at the end of March 2025, an increase of 0.4 percentage points from the end of last quarter. Total Capital ratio increased 0.4 percentage points since end of last quarter to 29.0%. The increase last quarter was primarily due to a decrease of the mortgage portfolio since year end.

At the end of March 2025 the Risk Exposure Amount (REA) was NOK 127.5bn, a decrease of 2% compared to the end of last year (NOK 130.0bn). The main driver for the decrease is somewhat reduced loan portfolio. Own funds were NOK 37.0bn at the end of March 2025, of which NOK 1.1bn is a subordinated loan. The Tier 1 capital and the Common Equity Tier 1 capital were NOK 35.9bn (no additional Tier 1 capital).

Other information

Macroeconomy

Norwegian mainland GDP decreased by 0.4% quarter on quarter in the fourth quarter of 2024 due to a further decline in housing investments. The unemployment rate fell to 2.0% on a seasonally adjusted basis in January 2025 and remained unchanged in February and March. Housing prices were up 7% year on year in March. Consumer price inflation has increased: headline consumer price inflation stood at 2.6% in March and underlying inflation, excluding energy and taxes, stood at 3.4%. Norges Bank's policy rate has remained at 4.5% since December 2023. The central bank's latest forecast is that the first rate cut will come in September 2025. The Norwegian krone broadly strengthened during the first quarter.

Notes to the financial statements

Note 1 Accounting policies

The financial statements are prepared in accordance with International Accounting Standard (IAS) 34 "Interim Financial Reporting", as endorsed by the European Union (EU). In addition, certain complementary rules in the Norwegian Accounting Act with supported regulation have been applied.

The report includes a condensed set of financial statements and is to be read in conjunction with the audited consolidated financial statement for the year ended 31 December 2024. The accounting policies, method of computation and presentations are unchanged from the Annual Report 2024, except for the items presented in the section "Changed accounting policies and presentation" below. For more information, see the accounting policies in the 2024 Annual Report.

Changed accounting policies and presentation Changes to IFRSs

Amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates: Lack of Exchangeability, issued by the International Accounting Standards Board (IASB), were implemented by Nordea Eiendomskreditt on 1 January 2025 but have not had any significant impact on its financial statements.

Changes in IFRSs not yet applied IFRS 18 Presentation and Disclosures in Financial Statements

In April 2024 the IASB published the new standard IFRS 18 Presentation and Disclosure in Financial Statements, which will replace IAS 1 Presentation of Financial Statements. IFRS 18 sets out the requirements for the presentation and disclosure of financial performance in financial statements, focusing on a more structured income statement, with defined subtotals. Income and expense items are split into five categories, based on main business activities. Of these, the categories operating, investing and financing are new. The categories income taxes and discontinued operations are as before. The aim is to ensure a structured summary of companies' primary financial statements and reduce variation in the reporting of financial performance, enabling users to better understand the information and more easily compare companies. IFRS 18 also introduces enhanced requirements for the aggregation and disaggregation of financial information in the primary financial statements and the notes, which may also impact the presentation on the balance sheet. In addition, the standard introduces new disclosures in a single note on certain profit or loss measures outside the financial statements (management-defined performance measures).

IFRS 18 will be effective for annual reporting periods beginning on or after 1 January 2027, with earlier application permitted. The standard is not yet endorsed by the EU. Nordea Eiendomskreditt does not currently intend to adopt the amendments before the effective date.

It is not yet possible to conclude on how IFRS 18 will impact Nordea Eiendomskreditt's financial statements and disclosures of management-defined performance measures. There may be transfers between the different categories in the income statement mentioned above, and changes in the aggregation and disaggregation of financial information in the income statement and on the balance sheet, but no significant impacts are currently expected. This tentative conclusion remains subject to further analysis. As IFRS 18 will not change Nordea Eiendomskreditt's recognition and measurement, it is not expected to have any other significant impact on the company's financial statements or capital adequacy in the period of initial application.

Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and

In May 2024 the IASB published Amendments to the Classification and Measurement of Financial instruments (Amendments to IFRS 9 and IFRS 7).

The amendments clarify whether contractual cash flows of financial assets with contingent features, e.g. ESG-linked features, represent Solely Payment of Principal and Interest (SPPI), which is a condition for measurement at amortised cost. Under the amendments certain financial assets, including those with ESG-linked features, can meet the SPPI criterion at initial recognition, provided that their cash flows are not significantly different from the cash flows from identical financial assets without such features Additional disclosures on financial assets and financial liabilities with contingent features will also be required. The new requirements are expected to support Nordea Eiendomskreditt's current accounting treatment of loans with ESG-linked features and are consequently not expected to have any significant impact on the financial statements or capital adequacy of Nordea Eiendomskreditt in the period of initial application, other than disclosures.

The amendments also clarify the characteristics of contractually-linked instruments and non-recourse features. The current assessment is that these clarifications will not significantly impact the current classification of financial assets or capital adequacy in the period of initial application, but this remains subject to further analysis and is naturally dependent on the instruments on the balance sheet of Nordea Eiendomskreditt at the time of transition.

The amendments address the recognition and derecognition of financial assets and financial liabilities including an optional exception relating to the derecognition of financial liabilities that are settled using an electronic payment system. The current assessment is that this amendment will not significantly impact the financial statements or capital adequacy of Nordea Eiendosmkreditt in the period of initial application, but this remains subject to further analysis. The new standard is effective for annual reporting periods beginning on or after 1 January 2026, with earlier application permitted. The standard is not yet endorsed by the EU.

Other amendments

The following changes in IFRSs not yet applied by Nordea are not assessed to have any significant impact on its financial statements or capital adequacy in the period of their initial application.

- IFRS 19 Subsidiaries without Public Accountability:
- Contracts Referencing Nature-dependent Electricity (Amendments to IFRS 9 and IFRS 7).
- Ànnual Improvements Volume 11.

¹ Impaired loans (Stage 3) before allowances divided by total loans measured at amortised cost before allowances.

Nordea Nordea

² Impaired loans (Stage 3) after allowances divided by total loans measured at amortised cost before allowances.

³ Total allowances divided by total loans measured at amortised cost before allowances.

⁴ Allowances for impaired loans (stage 3) divided by impaired loans measured at amortised cost (stage 3) before allowances.

⁵ Allowances for not impaired loans (stage 1 and 2) divided by not impaired loans measured at amortised cost (stage 1 and 2) before allowances.

Forward-looking information

Forward-looking information is used for both assessing significant increases in credit risk and calculating expected credit losses. Nordea Eiendomskreditt uses three macroeconomic scenarios: a baseline scenario, a favourable scenario and an adverse scenario. The macroeconomic scenarios are provided by Group Risk in Nordea, based on the Oxford Economics Model. The forecast is a combination of modelling and expert judgement, subject to thorough checks and quality control processes. The model has been built to give a good description of the historical relationships between economic variables and to capture the key linkages between those variables. The forecast period in the model is ten years. For periods beyond, a long-term average is used in the ECL calculations.

The macroeconomic scenarios reflect Nordea's view of how the Nordic economies might develop in the light of continued geopolitical uncertainty, trade conflicts and weak growth in major European economies. When developing the scenarios and determining the relative weighting between them, Nordea took into account projections made by Nordic central banks, Nordea Research and the European Central Bank.

The baseline scenario foresees soft landings in the Nordic economies, with unemployment largely unchanged in the coming years. Denmark will see relatively high growth, driven by the pharmaceutical sector and the reopening of North Sea oil and gas fields. The other Nordic countries will see higher growth in 2025, with Finland emerging from a mild recession. The stronger growth outlook is supported by weaker inflation and lower interest rates. The exception

is Norway, where the weak currency and relatively high activity levels have led the central bank to keep interest rates constant. A modest recovery in home prices is expected to continue over the coming years, supported by rising household purchasing power. The risks around the baseline forecast are tilted to the downside, with the favourable scenario deviating less from the baseline than the adverse.

Nordea's two alternative macroeconomic scenarios cover a range of plausible risk factors which may cause growth to deviate from the baseline scenario. An escalation of the trade conflict between the US and several countries could trigger a European and Nordic recession as firms postpone investments, exports slow down and households cut spending due to weakening labour markets. Central banks may in addition regard the inflationary impulse from higher tariffs as temporary and continue cutting interest rates, with rates moving lower than in the baseline scenario in 2025. Normalising inflation and lower interest rates, on the other hand, may lead to a stronger recovery than assumed in the baseline scenario.

At the end of the first quarter of 2025 adjustments to model-based allowances/provisions (management judgements) were NOK 174m. The management judgement allowances cover expected credit losses not yet adequately captured by the IFRS 9 modelled outcome. During the quarter allowance levels were reassessed and NOK 47m were released due to improved macroeconomic outlook, including stabilised interest rate levels. The management judgements are split between a cyclical element of NOK 170m and a structural element (covering issues identified in the IFRS 9 model to be later covered in model updates) of NOK 4m.

| Over-collateralization calculated on net outstanding | | | | | | |
| covered bonds | 60.5% | 60.1% | 45.3% | 44.4% | 58.8% | 62.1% |
| Debt securities in issue (issued amount) | 262,916,450 | 262,765,291 | 221,669,900 | 222,217,628 | 269,536,100 | 263,281,924 |
| Over-collateralization calculated on issued covered bonds (gross outstanding covered bonds) ¹ | 60.5% | 60.1% | 45.3% | 44.4% | 58.8% | 62.1% |

¹ Without deduction for holdings of own bonds, if any.

The increase in OC since year end is a net effect of reduced cover pool and reduced outstanding covered bonds, where the reduction is largest for the latter.

The guidelines for calculating the over-collateralization requirement in the Norwegian legislation is given in the Financial Undertakings Act (Act No. 17 of 10 April 2015)

Chapter 11 Bonds secured on a loan portfolio (covered bonds), and appurtenant regulations. The calculation shall be based on gross outstanding covered bonds and by use of nominal values. Net present values are disclosed for information and may differ from fair values disclosed in other notes to this report due to different calculation methods.

Note 11 Risks and uncertainties

Within the framework of its normal business operations, Nordea Eiendomskreditt faces various risks and uncertainties. Nordea Eiendomskreditt's sole business activity is lending secured by residential properties and holiday homes in Norway, and the company's main risk exposure is credit risk, which means the ability of its borrowers to service their loans.

Being an issuer of covered bonds, the company is also exposed to changes in the residential property market and the market for holiday homes. A decline in housing prices will reduce the value of the company's cover pool for the purpose of calculating the regulatory asset coverage requirement. Quarterly stress tests are carried out to estimate the effects of declining prices for residential properties and holiday homes. At the end of the first quarter of 2025 the overcollateralization (OC) was 60.5%, meaning that the company can withstand a significant price drop without breaching the regulatory OC requirement. A drop in house prices will also increase the credit risk and may lead to increased loan losses in case of default, due to decreased value of the collateral.

There are significant risks related to the macroeconomic environment due to ongoing geopolitical developments and trade tensions. Reduced consumer spending and lower activity may particularly impact small and medium sized enterprises in certain industries. Depending on future developments, there may be increased credit risk in Nordea Eiendomskreditt's mortgage loan portfolio. Potential future credit risks are addressed in Note 7 "Loans and impairment" and in the section "Net loan losses" in the Board of Directors' Report.

Nordea Eiendomskreditt is also exposed to risks such as market risk, liquidity risk and operational risk. These risks are managed according to processes and limits established in Nordea Eiendomskreditt's Risk Appetite Framework. Further information on the composition of the company's risk exposure and risk management can be found in the Annual Report.

There have been no disputes or legal proceedings in which material claims have been raised against the company.

Note 12 Related-party transactions

Nordea Eiendomskreditt considers that its related parties include its parent company, other companies in the Nordea group, and key persons in senior positions.

Interest rate risk and currency risk that arise as part of Nordea Eiendomskreditt's normal business activities, are hedged using interest rate and currency swaps. Only counterparties to derivative contracts are Nordea Group internal. The volume of interest rate swaps was NOK 42bn (NOK 47bn) and currency swaps NOK 1bn (NOK 1bn) at the end of the first quarter 2025. Nordea Bank Abp, filial i Norge provides unsecured funding to Nordea Eiendomskreditt, and at the end of the first quarter 2025 such borrowings amounted to NOK 154bn including accrued interests.

Subordinated loans provided by Nordea Bank Abp was NOK 1.1bn at the end of the first quarter. In addition, Nordea Bank Abp had a holding of covered bonds issued by Nordea Eiendomskreditt of NOK 38bn at the end of the first quarter of 2025.

Loans to the public are managed by Nordea Bank Abp, filial i Norge. For loans issued directly from Nordea Eiendomskreditt, also credit assessment and other processes in relation to the loan origination, are performed by Nordea Bank Abp, filial i Norge. For this service Nordea Eiendomskreditt has paid an amount of NOK 498m in 2025 (NOK 301m). Nordea Eiendomskreditt also buys services related to funding and risk control, accounting and reporting, people services and IT services from the Nordea Group according to agreements entered into. For these services Nordea Eiendomskreditt has paid NOK 10m in 2025 (NOK 7m).

For the financial guarantee entered into with Nordea Bank Abp in September 2024, Nordea Eiendomskreditt has paid a provision fee of NOK 6.7m in the first guarter of 2025.

All group internal transactions are settled according to market-based principles on conformity with OECD requirements on transfer pricing.
