C. Harmonised Transparency Template - Glossary

HTT 2023

The definitions below reflect the national specificities

Field Number	1. Glossary - Standard Harmonised Items	Definition
HG.1.1	OC Calculation: Statutory	Statutory Overcollateralisation is the overcollateralisation percentage required to be provided by each Issuer and included/disclosed in the national covered bond framework.
HG.1.2	OC Calculation: Contractual	Contractual Overcollateralisation is the overcollateralisation percentage each Issuer has contractually agreed to maintain pursuant to the covered bond programme documents.
HG.1.3	OC Calculation: Voluntary	Voluntary Overcollateralisation is the difference (if positive) between the actual overcollateralisation provided by an Issuer and the higher of the contractual and statutory overcollateralisation.
		Index Loans: These are loans where instalments and outstanding debt are adjusted with the development of an index which typically reflects trends in consumer prices. The loan type was introduced in Denmark in 1982. All Danish index loans have index semi-annual payment dates (January 1st and July 1st). Index loans are offered as cash loans. The maturity depends on the loan type. Especially the maturity for subsidized housing depends on the size of the future inflation rate.
		Fixed-rate loans: The long-term – typically 30-year – fixed-rate, callable loan is considered the most traditional mortgage loan. With this loan, the borrower knows in advance the fixed repayments throughout the term of the loan. The long-term fixed-rate mortgage loan has a prepayment option which may be exercised in two ways, i.e. the borrowers may prepay their outstanding debt at a price of 100 (par) or the borrowers may purchase the underlying bonds in the financial markets and deliver them to the mortgage bank. This loan type is also offered with interest-only periods.
	Interest Rate Types	Adjustable Rate Mortgages: Adjustable-rate mortgages (ARMs) were introduced in 1996 and the main advantage of ARMs is that interest rates are generally lower than those of fixed-rate loans when raised. The interest rate is generally reset at a frequency of 1, 3, 5 or 10 years and the underlying bonds are replaced by new bonds. The yield of the new bonds determines the loan rate for the period until the next interest rate reset. The lower initial loan rate should therefore be weighed against the risk that it will increase during the loan term. An ARM may be prepaid at a price of 100 in connection with each interest rate reset. Alternatively, the borrower may prepay the loan by purchasing the bonds on market terms – as with all mortgage loans. This loan type is also offered with interest-only periods.
		Money market based loans: The loan rate changes at generally every three or six months. In addition, this loan type differs from ARMs as this interest rate depends on a reference rate, ie an interest rate determined in another market. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA (Copenhagen Interbank Tomorrow/Next Average), an interest rate which is quoted daily by the DFBF (the Danish Financial Benchmark Facility). This loan type is also offered with interest-only periods.
		Non Capped floaters: These are loans where the rate changes at generally three or six months. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA (Copenhagen Interbank Tomorrow/Next Average), an interest rate which is quoted daily by the DFBF
HG.1.4	Residual Life Buckets of Cover assets [i.e. how is the contractual and/or expected residual life defined? What assumptions eg, in terms of prepayments? etc.]	Only contractual maturity is relevant and reported. Early repayments happens at borrower's discretion is among other thing depending on interest rate developments and cannot be anticipated by issuer.
HG.1.5	Maturity Buckets of Covered Bonds [i.e. how is the contractual and/or expected maturity defined? What maturity structure (hard bullet, soft bullet, conditional pass through)? Under what conditions/circumstances? Etc.]	Only contractual maturity is relevant and reported. Early repayments happens at borrower's discretion is among other thing depending on interest rate developments and cannot be anticipated by issuer.
HG.1.6	Maturity Extension Triggers	[insert link to the national legislation where the maturity extension triggers are listed - insert link of relevant programme prospectus]
HG.1.7	LTVs: Definition	LTV is reported continuously. The loans are distributed from the start Ltv of the loan to the marginal Ltv. This means that, if the loan is first rank, it is distributed proportionally by bracket size from 0 to the marginal
HG.1.8	LTVs: Calculation of property/shipping value	
HG.1.9	LTVs: Applied property/shipping valuation techniques, including whether use of index, Automated Valuation Model (AVM) or on-site audits	
HG.1.10	LTVs: Frequency and time of last valuation	Minimum once pr. year for commercial properties. Minimum once every third year for owner occupied.
HG.1.11	Explain how mortgage types are defined whether for residential housing, multi-family housing, commercial real estate, etc. Same for shipping where relevant	The Danish FSA sets guidelines for the grouping of property in categories. Property type is determined by its primary use.
HG.1.12	Hedging Strategy (please explain how you address interest rate and currency risk)	
HG.1.13	Non-performing loans	A loan is categorised as non-performing when a borrower neglects a payment failing to pay instalments and / or interests.

[Key Concepts Explanation](#)

X3

[General explanation](#)

This transparency template is compliant with the requirements in CRR 129(7) and is used with ECBC labelled covered bonds issues by the three issuer categories below.

Mandatory tables

Please note that not all tables are applicable to each issuer type and that some information is optional. Information on applicability is given below and where relevant in connection with the tables in the template.

Specialised mortgage banks

Tables A, G1.1, G2-4, M1-M12, X1-3

Ship finance institutes

Tables A, G1.1, G2-4, S1-S13, X1-3

Non-specialised bank CBs issuers

Tables G1.1 (except total capital coverage), G2-4, B1-B1, X1-3

Voluntary tables

The issuer can insert voluntary tables that contain information in addition to what is contained in the Danish ECBC label template. It shall be possible to distinguish mandatory and voluntary tables.

The voluntary tables must be named V1....Vn, where n is the number of voluntary tables.

Voluntary tables must be marked with a colour different from the colour used for the mandatory tables in the Danish ECBC label template.

Match funded (without interest and/or currency risk)	100%
Completely hedged with derivatives	xx%
Un-hedged interest rate risk	xx%
Un-hedged currency risk	xx%
- Of which EUR	x,x%
- Of which DKK	x,x%
- Of which...	x,x%

Table G3 – Legal ALM (balance principle) adherence¹

Issue adherence	
General balance principle	No
Specific balance principle	Yes

1) Cf. the Danish Executive Order on bond issuance, balance principle and risk management

Table G4 – Additional characteristics of ALM business model for issued CBs

Issue adherence	
Yes	No
One-to-one balance between terms of granted loans and bonds issued, i.e. daily tap issuance?	X
Pass-through cash flow from borrowers to investors?	X
Asset substitution in cover pool allowed?	X

Note: * A few older traditional Danish mortgage bonds are not CRD compliant

90 day NPL	1,66	0,50	-	-	-	-	0,02	-	-	-	1,38

Note: 90-days arrears. Payments for Q2 2022 in arrears as per Q3 2022 as a share of scheduled payments for the Q2 2022 payment term (See definition in table X1)

Table M11a/B11a

90 day Non-performing loans by property type, as percentage of lending, %

	Owner-occupied homes	Holiday houses	Subsidised Housing	Cooperative Housing	Private rental	Manufacturing and Manual Industries	Office and Business	Agriculture	Social and cultural purposes	Other	Total
90 day NPL	2,03	0,90	-	-	-	-	1,65	-	-	-	1,79

Note: Outstanding debt for loans in arrears (pls cf. Table M11) as a share of outstanding loans for the property category in question

Table M11b/B11b

90 day Non-performing loans by property type, as percentage of lending, by continuous LTV bracket, %

	Owner-occupied homes	Holiday houses	Subsidised Housing	Cooperative Housing	Private rental	Manufacturing and Manual Industries	Office and Business	Agriculture	Social and cultural purposes	Other	Total
< 60 per cent LTV	1,90	0,70	-	-	-	-	1,65	-	-	-	1,67
60-69.9 per cent LTV	0,06	0,07	-	-	-	-	-	-	-	-	0,05
70-79.9 per cent LTV	0,02	0,07	-	-	-	-	-	-	-	-	0,02
80-89.9 per cent LTV	0,02	0,05	-	-	-	-	-	-	-	-	0,02
90-100 per cent LTV	0,02	-	-	-	-	-	-	-	-	-	0,02
>100 per cent LTV	0,02	-	-	-	-	-	-	-	-	-	0,02

Note: Outstanding debt for loans in arrears (pls cf. Table M11) as a share of outstanding loans for the property category in question

Table M12/B12

Realised losses (DKKbn)

	Owner-occupied homes	Holiday houses	Subsidised Housing	Cooperative Housing	Private rental	Manufacturing and Manual Industries	Office and Business	Agriculture	Social and cultural purposes	Other	Total
Total realised losses	2,47	-	-	-	-	-	-	0,00	-	0,00	2,47

Note: The data cover both Nordea Kredit's two capital centres

Table M12a/B12a

Realised losses (%)

	Owner-occupied homes	Holiday houses	Subsidised Housing	Cooperative Housing	Private rental	Manufacturing and Manual Industries	Office and Business	Agriculture	Social and cultural purposes	Other	Total
Total realised losses, %	0,00	-	-	-	-	-	-	0,00	-	0,00	0,00

Note: Realised losses as a share of outstanding debt for the property category in question. The data cover both Nordea Kredit's two capital centres.

Table X1	Key Concepts Explanation	General practice in Danish market	If issuers Key Concepts Explanation differs from general practice: State and explain in this column.
Residential versus commercial mortgages			
	Description of the difference made between residential/owner occupied and commercial properties	The Danish FSA sets guidelines for the grouping of property in categories. Property type is determined by its primary use.	
	Describe when you classify a property as commercial?	Property which primary purpose is owner occupation is characterised as residential. Whereas properties primarily used for commercial purposes are classified as commercial (cf. below). The Danish FSA sets guidelines for the grouping of property in categories. Examples of application of which classifies property as commercial are: · Office · Retail/shop · Warehouse · Restaurants, inns etc. · Hotels and resorts · Congress and conference centres. · Campsites. · Traffic terminals, service stations, fire stations, auction and export houses. · Agriculture · Forestry · Nurseries · Ships	
	E.g.: Private rental, Manufacturing and Manual Industries, Offices and Business, Agriculture.		
NPL (Non-performing loans)			
	Describe how you define NPLs	A loan is categorised as non-performing when a borrower neglects a payment failing to pay instalments and / or interests. The NPL rate is calculated at different time periods after the original payment date. Standard in Table A is 90 day arrear.	
	Explain how you distinguish between performing and nonperforming loans in the cover pool?	Commercial bank CB issuers adhere to the Basel definition of NPL. No distinction made. Asset substitution i not allowed for specialised mortgage banks.	
	Are NPLs parts of eligible assets in cover pool? Are NPL parts of non eligible assets in cover pool?	The Basel definition of NPL's is applied for commercial bank CB issuers Asset substitution i not allowed for specialised mortgage banks, hence NPLs are part of the cover pool.	
	Are loans in foreclosure procedure part of eligible assets in cover pool?	For commercial bank CB issuers NPL's are eligible assets in the cover pool. Asset substitution i not allowed for specialised mortgage banks, hence loans in foreclosure are part of the cover pool.	
	If NPL and/or loans in foreclosure procedure are part of the covered pool which provisions are made in respect of the value of these loans in the cover pool?	For commercial bank CB issuers loans in foreclosure procedure are eligible assets in the cover pool. The Danish FSA set rules for loss provisioning. In case of objective evidence of impairment provisioning for loss must be made.

Loan-to-Value (LTV)																																																																																											
Legal framework for valuation and LTV-calculation follow the rules of the Danish FSA - Bekendtgørelse nr. 687 af 20. juni 2007																																																																																											
Describe the method on which your LTV calculation is based	The publication contains two different ways to monitor LTV. One where loans are distributed continuously and one where they are distributed discretely. In both tables the fair value of the loans are distributed into predefined LTV bracket intervals. Table M4a/b4a and M4b/B4b displays the loans continuously. Table M4c/B4c and M4d/B4d displays the loans discretely. The continuous table(M4a/b4a and M4b/B4b) distributes the loans from the start ltv of the loan to the marginal ltv. This means that, if the loan is first rank, it is distributed proportionally by bracket size from 0 to the marginal ltv into the predefined brackets. If the loans has prior liens, it is distributed from the marginal ltv of the prior liens to the marginal ltv of the loan under consideration. The discrete table (M4c/b4c and M4d/B4d) distributes the total fair value of each loan into a single ltv bracket, according to the marginal ltv of the loan under consideration. Average LTV is weighted by loan balance categorised by property type. Example 1a below shows a case where the loan is first rank and distributed continuously. Example 1b shows the case where the loans has prior liens and distributed continuously. Example 2 below shows the discrete distribution of a loan.																																																																																										
	Frequency of collateral valuation for the purpose of calculating the LTV	Example 1a <u>Explanation</u> Example of a proportionally distribution into LTV brackets for a loan with LTV of 75 pct and a loan size of 1 million and no prior liens. <table><tr><th colspan="10">Loan-to-value (distribution continuously)</th></tr><tr><th>0-19.9</th><th>20-39.9</th><th>40-59.9</th><th>60-69.9</th><th>70-79.9</th><th>80-84.9</th><th>85-89.9</th><th>90-94.9</th><th>95-100</th><th>>100</th></tr><tr><td>266.667</td><td>266.667</td><td>266.667</td><td>133.333</td><td>66.667</td><td>-</td><td>-</td><td>-</td><td>-</td><td>-</td></tr></table> Example 1b <u>Explanation</u> Example of a continuous distribution into LTV brackets for a loan with LTV of 75 and a loan size of 1 million with prior liens consisting of a loan with a LTV of 40 pct. <table><tr><th colspan="10">Loan-to-value (distribution continuously)</th></tr><tr><th>0-19.9</th><th>20-39.9</th><th>40-59.9</th><th>60-69.9</th><th>70-79.9</th><th>80-84.9</th><th>85-89.9</th><th>90-94.9</th><th>95-100</th><th>>100</th></tr><tr><td>-</td><td>-</td><td>571.429</td><td>285.714</td><td>142.857</td><td>-</td><td>-</td><td>-</td><td>-</td><td>-</td></tr></table> Example 2 <u>Explanation</u> Example of discrete ("Sidste krone") distribution into LTV brackets for a loan with LTV of 75 and a loan size of 1 million In this example the 1.000.000 is distributed into the 70-79.9 interval because the LTV of the total loan is 75 <table><tr><th colspan="10">Loan-to-value (discrete/"Sidste krone" distribution)</th></tr><tr><th>0-19.9</th><th>20-39.9</th><th>40-59.9</th><th>60-69.9</th><th>70-79.9</th><th>80-84.9</th><th>85-89.9</th><th>90-94.9</th><th>95-100</th><th>>100</th></tr><tr><td>-</td><td>-</td><td>-</td><td>-</td><td>1.000.000</td><td>-</td><td>-</td><td>-</td><td>-</td><td>-</td></tr></table>	Loan-to-value (distribution continuously)										0-19.9	20-39.9	40-59.9	60-69.9	70-79.9	80-84.9	85-89.9	90-94.9	95-100	>100	266.667	266.667	266.667	133.333	66.667	-	-	-	-	-	Loan-to-value (distribution continuously)										0-19.9	20-39.9	40-59.9	60-69.9	70-79.9	80-84.9	85-89.9	90-94.9	95-100	>100	-	-	571.429	285.714	142.857	-	-	-	-	-	Loan-to-value (discrete/"Sidste krone" distribution)										0-19.9	20-39.9	40-59.9	60-69.9	70-79.9	80-84.9	85-89.9	90-94.9	95-100	>100	-	-	-	-	1.000.000	-	-	-	-

Table X3

General explanation	General practice in Danish market
Table A	
Total Balance Sheet Assets	Total balance sheet assets as reported in the interim or annual reports of the issuer, fair value
Total Customer Loans (fair value)	All mortgage credit loans funded by the issue of covered mortgage bonds or mortgage bonds measured at fair value
Tier 1 Ratio (%)	The tier 1 capital ratio as stipulated in DFSA regulations
Solvency Ratio (%)	The solvency ratio as stipulated in DFSA regulations
Outstanding Covered Bonds (fair value)	The circulating amount of covered bonds (including covered mortgage bonds and mortgage bonds)
Outstanding Senior Unsecured Liabilities	All outstanding senior unsecured liabilities including any intra-group senior unsecured liabilities to finance OC- and LTV-ratio requirements
Senior Secured Bonds	Senior secured bonds - formerly known as JCB (§ 15)
Guarantees (e.g. provided by states, municipalities, banks)	All guarantees backing the granted loans provided by e.g. states, municipalities or banks
Net loan losses (Net loan losses and net loan loss provisions)	The item taken from the issuer's profit & loss account
Value of acquired properties / ships (temporary possessions, end quarter)	Value as entered in interim and annual reports and as reported to the DFSA; The lower of the carrying amount at the time of classification and the fair value less selling costs.
Total customer loans (market value)	All mortgage credit loans funded by the issue of covered mortgage bonds or mortgage bonds measured at market value
Maturity	Maturity distribution of all mortgage credit loans
Non-performing loans (See definition in table X1)	Please see definition of Non-performing loans in table X1
Loan loss provisions (sum of total individual and group wise loss provisions, end of quarter)	All individual and group wise loan loss provisions as stated in the issuer's interim and annual accounts

General explanation	General practice in Danish market
Table G1.1	
Nominal cover pool (total value)	Sum of nominal value of covered bonds + Senior secured debt + capital. Capital is: Additional tier 1 capital (e.g. hybrid core capital) and Core tier 1 capital
Transmission or liquidation proceeds to CB holders (for redemption of CBs maturing 0-1 day)	Liquidity due to be paid out next day in connection with refinancing
Overcollateralisation	Total value of cover pool - nominal value of covered bonds
Senior secured debt	Total nominal value of senior secured debt
Senior unsecured debt	Issuers senior unsecured liabilities targeted to finance OC- and LTV-ratio requirements in cover pool
Tier 2 capital	Subordinated debt
Additional tier 1 capital (e.g. hybrid core capital)	Hybrid Tier 1 capital (perpetual debt instruments).
Core tier 1 capital	Equity capital and retained earnings.

General explanation	General practice in Danish market	The issuer can elaborate on the applied balance principle. E.g. describe if stricter practice is applied than required by law
Table G3		
General balance principle	The general balance principle does not require a one-to-one balance between the loan and the bonds issued. This gives the credit institution a wider scope for taking liquidity risk than the more strict specific balance principle.	
Specific balance principle	The specific balance principle ensures a one-to-one balance between loans and bonds issued, and is used for the issuance of SDRO, SDO and RO bonds. The specific balance principle de facto implies full cash flow pass through from borrowers to investors. Under this principle daily loan origination is continuously tapped into the market, and the individual borrower loan rate is determined directly by the bond sales price for the corresponding financing amount of bonds. All borrower payments of interest and principal match the interest and principal payments to investors exactly (borrower payments fall due one day prior to the payments to investors). Redemptions take place by borrowers' buy back of the financing bond in the market at market price, or (for callable bonds) by calling the bond at par. In the latter case the borrower prepayment match the bond draw down. Market risks are thus eliminated under this issuance model (i.e. interest rate risk, prepayment risks, liquidity risks and funding risks). Further, asset substitution is not possible under this issuance model.	

General explanation	General practice in Danish market
Table G4	
One-to-one balance between terms of granted loans and bonds issued, i.e. daily tap issuance?	Mortgage banks issue and sell bonds to investors, who then fund the loans. During the loan terms, borrowers make principal and interest payments to mortgage banks which transfer the amounts to investors. Mortgage banks charge a margin from the borrower to cover daily operating costs, potential losses, and to make a profit. The margin is a percentage of the outstanding debt which the borrower pays throughout the loan term. The margin rate corresponds to the interest margin of a bank but is generally lower. The issuance is made on a daily basis.
Pass-through cash flow from borrowers to investors?	Yes, the mortgage bank is an intermediary between persons requiring loans for the purchase of real properties and investors funding the loans by purchasing bonds.
Asset substitution in cover pool allowed?	No, (due to Danish legislation) asset substitution is not allowed/possible.

General explanation	General practice in Danish market
Table M1-M5	
Owner-occupied homes	Private owned residential used by the owner. Max LTV are 80 % (legislation).
Holiday houses	Holiday houses for owners own use or for renting. Max LTV are 60 % (legislation).
Subsidised Housing	Residential renting subsidised by the government. Max LTV 80 %. LTVs above 80 % can be granted against full governmental guarantee.
Cooperative Housing	Residential property owned and administered by the cooperative and used by the members of the cooperative. Max LTV 80 % (legislation).
Private rental	Residential property rented out to private tenants. Max LTV 80 % (legislation).
Manufacturing and Manual Industries	Industrial and manufacture buildings and warehouse for own use or for rent. Max LTV are 60 % (legislation).
Office and Business	Office property and retail buildings for own use or for rent. Max LTV are 60 % (legislation).
Agriculture	Property and land for agricultural use. Max LTV 70 % (legislation).
Social and cultural purposes	Property used for education, kindergartens, museum and other buildings for public use. Max LTV are 70 % (legislation).
Other	Property, that can not be placed in the categories above. Max LTV are 70 % (legislation).

General explanation	General practice in Danish market
Table M6-M8	
Index Loans	These are loans where instalments and outstanding debt are adjusted with the development of an index which typically reflects trends in consumer prices. The loan type was introduced in 1996.
Fixed-rate loans	The long-term - typically 30-year - fixed-rate, callable loan is considered the most traditional mortgage loan. With this loan, the borrower knows in advance the fixed repayments.
Adjustable Rate Mortgages	Adjustable-rate mortgages (ARMs) were introduced in 1996 and the main advantage of ARMs is that interest rates are generally lower than those of fixed-rate loans when raised. The loan rate changes at generally three or six months. In addition, this loan type differs from ARMs as this interest rate depends on a reference rate, ie an interest rate determined in These are loans where the rate changes at generally three or six months. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA.
Money market based loans	
Non capped floaters	It is possible to get a loan with a floating interest rate which cannot exceed a certain level (cap). In this way, the borrower hedges against major interest rate increases. If a loan has a cap.
Capped floaters	Any other loan types, which not comply with the above mentioned.
Other	

General explanation	General practice in Danish market
Table M9-10	
Seasoning	Seasoning defined by duration of customer relationship, calculated from the first disbursement of a mortgage loan.
