	Harmonised Transparency Template - Frequently Asked Questions
neral Questions	
estion 1: What is the	estructure of the Harmonised Transparency Template (HTT)?
Response 1	The HTT contains 5 main worksheets (A, B1, B2, B3 and C). The first worksheet (A) includes the HTT general information. The second worksheet (B1) presents the mortgage information. The third worksheet (B2) contains the public sector information. The fourth worksheet (B3) contains shipping information. The fifth worksheet (C) represents the HTT glossary, which has a harmonised section across jurisdictionsat the top, but also a section for national specificities below. Any additional tabs (D, E, etc.), will contain the National Transparency Template (NTT) information where relevant.
estion 2: Is the HTT	going to replace the National Transparency Template (NTT)?
Response 2	If a jurisdiction wishes to only use the HTT, it can do so. Otherwise, the HTT will be an add-on to the existing NTT. While the HTT is based on an international agreement, the NTT section will remain under the discretion of the jurisdiction.
uestion 3: What is the	reporting frequency of the HTT?
Response 3	The reporting of the HTT is the same as the reporting of the National Transparency Template (NTT), i.e. at least quarterly.
estion 4: Where sho	uld the HTT be posted?
Response 4	The HTT should be posted in the same location as the National Transparency Template (NTT) is currently posted, i.e. on the issuer's website. There is no common platform for the HTT.
estion 5: In what for	mat the HTT should be disclosed?
Response 5	The HTT should be disclosed in Excel format in so far as it is possible, as already suggested by the Label Advisory Council and investors. Where issuers are currently providing the Template in both E and PDF formats, they are encouraged to continue to do so.
estion 6: Where can	l find the reporting date?
Response 6	The reporting date can be found in the Introduction Tab and in the "Basic Facts" section of worksheet A.
uestion 7: What happ	ens when I cannot complete a section of the HTT?
Response 7	When the information is either (i) not applicable for the jurisdiction, (ii) not relevant for the issuer and/or CB programme at the present time; or (iii) not available at the present time; issuers are kir requested to include ND1, ND2 or ND3 respectively.
pecific Questions	
uestion 8: Does the H	armonised Transparency Template only contain disaggregated information for mortgages and public sector?
Response 8	Indeed, the HTT only provides disaggregated information for mortgage and public sector assets which represent 99.6% of total outstanding. Information in more detail on other collateral types can always be included in worksheet E, which may contains the National Transparency Template (NTT).
uestion 9: How should	d the "liquid assets" be calculated in the section 3 "General Cover Pool / Covered Bond Information" of the HTT?
Response 9	Liquid assets are defined as central bank eligible assets, substitute and other marketable assets. This total is calculated over both outstanding covered bonds and outstanding covered assets.
uestion 10: How shou	ld the "expected" and "contratual" columns of the "Cover pool amortisation profile" be understood?
Response 10	Contractual maturities assume no prepayment scenario unlike expected maturities. Jurisdictions/issuers publishing the two should disclosed their prepayment assumptions for the latter.
uestion 11: How shou	ld the hedging columns included in section 3 "General Cover Pool / Covered Bond Information" of the HTT be understood?
Response 11	The currency breakdown before/after hedging aims to assess the potential currency mismatch on the asset and liability sides. This is supplemented by explanations on the issuer's hedging strategy the Harmonised Glossary.

The issuer believes that, at the time of its issuance and based on transparency data made publicly available by the issuer, these covered bonds would satisfy the eligibility criteria for Article 129(7) of the Capital Requirements Regulation (EU) 648/2012. It should be noted, however, that

whether or not exposures in the form of covered bonds are eligible to preferential treatment under Regulation (EU) 648/2012 is ultimately a matter to be determined by a relevant investor institution and its relevant supervisory authority and the issuer does not accept any responsibility in this regard.

Table X1 Key Concepts Explanation	General practice in Danish market	If issuers Key Concepts Explanation differs from general practice: State and explain in this column.
Residential versus commercial mortgages		
Description of the difference made between residential/owner occupied and commercial properties	The Danish FSA sets guidelines for the grouping of property in categories. Property type is determined by its primary use.	,
	Property which primary purpose is owner occupation is characterised as residential. Whereas properties primarily used for commercial purposes are classified as commercial (cf. below).  The Danish FSA sets guidelines for the grouping of property in categories. Example	25
Describe when you classify a property as commercial?	of application of which classifies property as commercial are: Office	
E.g.: Private rental, Manufacturing and Manual Industries, Offices and Busin Agriculture.  NPL (Non-performing loans)	Retail/shop     Warehouse     Restaurants, inns etc.     Hotels and resorts     Congress and conference centres.     Campsites.     Traffic terminals, service stations, fire stations, auction and export houses.     Agriculture     Forestry     Nurseries     Ships  A loan is categorised as non-performing when a borrower neglects a payment failing to pay instalments and / or interests.	
Describe how you define NPLs	The NPL rate is calculated at different time periods after the original payment date. Standard in Table A is 90 day arrear.	
Explain how you distinguish between performing and nonperforming loans in cover pool?	Commercial bank CB issuers adhere to the Basel definition of NPL.  No distinction made. Asset substitution i not allowed for specialised mortgage the banks.	
	The Basel definition of NPL's is applied for commercial bank CB issuers  Asset substitution i not allowed for specialised mortgage banks, hence NPLs are	
Are NPLs parts of eligible assets in cover pool? Are NPL parts of non eligible asset cover pool?		
	For commercial bank CB issuers NPL's are eligible assets in the cover pool.  Asset substitution i not allowed for specialised mortgage banks, hence loans in foreclosure are part of the cover pool.	
Are loans in foreclosure procedure part of eligible assets in cover pool?	For commercial bank CB issuers loans in foreclosure procedure are eligible assets	
If NPL and/or loans in foreclosure procedure are part of the covered pool w provisions are made in respect of the value of these loans in the cover pool?	in the cover pool.  hich The Danish FSA set rules for loss provisioning. In case of objective evidence of impairment provisioning for loss must be made.	

Table X2 Key Concepts Explanation Issuer specific (N/A for some issuers) Guaranteed loans (if part of the cover pool)
How are the loans guaranteed?
Please provide details of guarantors Loan-to-Value (LTV) Legal framework for valuation and LTV-calculation follow the rules of the Danish FSA - Bekendtgørelse nr. 687 af 20. juni 2007
The publication contains two different ways to monitor LTV. One where loans are distributed continuously and one where they are distributed discretely.
In both tables the fair value of the loans are distributed into predefined LTV bracket intervals. Table M4a/b4a and M4b/B4b displays the loa continuously. Table M4c/B4c and M4d/B4d displays the loans discretely. The continuous table(M4a/b4a and M4b/b4b) distributes the loans from the start Itv of the loan to the marginal Itv. This means that, if the loan is first rank, it is distributed proportionally by bracket size from 0 to the marginal Itv into the predefined brackets. If the loans has prior calculation is based The discrete table (M4c/b4c and M4d/B4d) distributes the total fair value of each loan into a single Itv bracket, according to the marginal Itv of the loan under consideration. Average LTV is weighted by loan balance categorised by property type. Example 1a below shows a case where the loan is first rank and distributed continuously. Example 1b shows the case where the loans has prior liens and distributed continuously. Example 2 below shows the discrete distribution of a loan. Frequency of collateral valuation for the purpose of calculating the LTV Example 1a Explanation

Example of a proportionaly distribution into LTV brackets for a loan with LTV of 75 pct and a loan size of 1 million and no prior liens. Loan-to-value (distribution continuously) 019.9 20.39.9 40.59.9 60.69.9 70.79.9 80.84.9 85.89.9 90.94.9 95.100 >100 266.667 266.667 266.667 133.333 66.667 - - - - - - -Explanation

Example of a continuous distribution into LTV brackets for a loan with LTV of 75 and a loan size of 1 million with prior liens consisting of a loan with a LTV of 40 pct. 01-9.9 20-39.9 40-59.9 60-69.9 70-79.9 80-84.9 85-89.9 90-94.9 95-100 >100
- - - 571.429 285.714 142.857 - - - - - - - -Example 2 Explanation
Example of discrete ("Sidste krone") distribution into LTV brackets for a loan with LTV of 75 and a loan size of 1 million
in this example the 1.000.000 is distributed into the 70-79.9 interval because the LTV of the total loan is 7: Loan-to-value (discrete/"Sidste krone" distribution)

General explanation	General practice in Danish market	The issuer can elaborate on the applied balance priciple.
Table G3		E.g. describe if stricter pratice is applied than required by law
General balance principle	The general balance principle does not require a one-to-one balance between the loan and the bonds issued. This gives the credit institution a wider scope for taking liquidity risk than the more strict specific balance principle.	
Specific balance principle	The specific balance principle ensures a one-to-one balance between loans and bonds issued, and is used for the issuance of SDRO, SDO and RO bonds.  The specific balance principle de facto implies full cash flow pass through from borrowers to investors. Under this principle daily loan origination is continuously tapped into the market, and the individual borrower loan rate is determined directly by the bond sales price for the corresponding financing amount of bonds. All borrower payments of interest and principal payments to investors exactly (borrower payments fall due one day prior to the payments to investors). Redemptions take place by borrowers' buy back of the financing bond in the market a market price, or for caliable bonds) by calling the bond at par. In the latter case the borrower prepayment match the bond draw down.  Market risks are thus eliminated under this issuance model (i.e. interest rate risk, prepayment risks, liquidity risks and funding risks). Further, asset substitution is not possible under this issuance model.

Table G4		
One-to-one balance between terms of granted loans and bonds issued, i.e. daily tap issuance?	Mortgage banks issue and sell bonds to investors, who then fund the loans. During the loan terms, borrowers make principal and interest payments to mortgage banks which transfer the amounts to investors. Mortgage banks charge a margin from the borrower to cover daily operating costs, potential losses, and to make a profit. The margin is a percentage of the outstanding debt which the borrower pays throughout the loan term. The margin rate corresponds to the interest margin of a bank but is generally lower. The issuance is made on a daily basis.	
Pass-through cash flow from borrowers to investors?	Yes, the mortgage bank is an intermediary between persons requiring loans for the purchase of real properties and investors funding the loans by purchasing bonds.	
Asset substitution in cover pool allowed?	No. (due to Danish legislation) asset substitution is not allowed/possible.
