Net interest income

## Net interest income sensitivity to policy rate increases

### Sensitivity to +50bp parallel rate shift in policy rates

### Estimated incremental full year NII impact solely from higher policy rates, EURm

### Policy rate path expectations

- **NII impact is largely driven by policy rates and pass-through**

- Expected higher policy rates in 2023 are estimated to increase NII by EUR ~1.0-1.3bn, solely related to rates impact
- Actual pass-through will vary between account types and countries, and throughout rate hike cycle

- **Group NII is also impacted by other drivers**

- Volumes ↑
- Asset pricing ↔
- Wholesale funding costs ↓
- Deposit hedging ↓

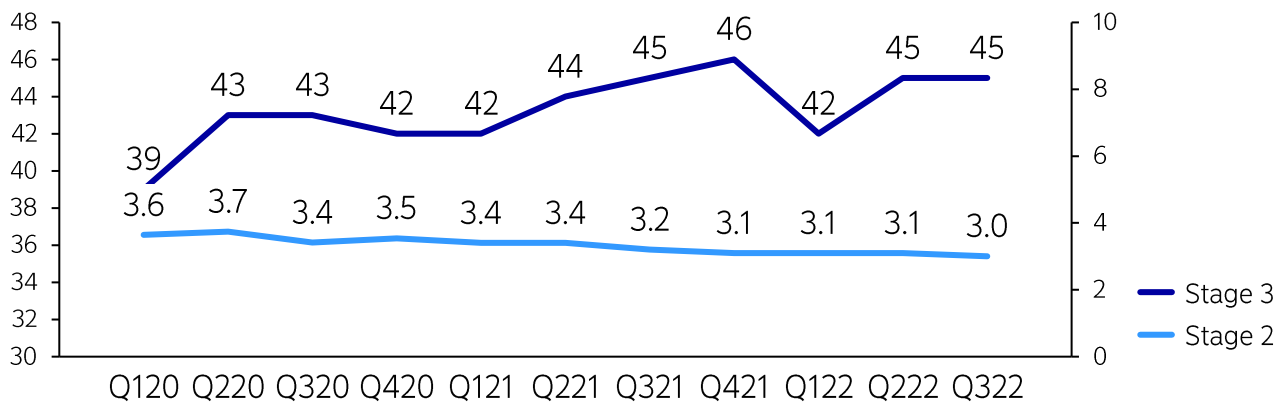

Impairments and provisioning coverage

## Strong and stable portfolio credit quality

Stage 2 and 3 loans at amortised cost, EURm
